Custom Machined Metal

Need precision metal parts in four weeks?

Olympian Machine is a leader in precision machined metal parts for the Oil & Gas industry. You can rely on Olympian Machine for superior quality and quick turnaround on custom machined metal parts. We maintain numerous lathes and mills to efficiently run small and large custom orders.

Materials

Olympian Machine's custom parts meet the highest quality standards. We machine those parts from the materials listed below.

| Material | Description |
|------------------|---|
| Alloy steel | 4130-4145, 4340, 8620, 9310 |
| Aluminum | 1100, 2024, 3003, 5052, 6061, 6063, 7075 |
| Beryllium copper | C17200, A25, AT (TFOO), HT (TH04), C173 |
| CF carbon | 1018-1026, 12L14, 1215, A105, A350-LF2 |
| Nickel | 400, K500, 718 |
| Stainless steel | 303, 304, 316, 410, 420, 17-4PH, 13-8PH, 15-5PH, NIT50, NIT60 |
| Other | Aluminum Bronze, Hyper Chrome, Inconel |

Products

Our products are most widely used in downhole testing, drilling, fracking, liner hangers, subsurface packers, subsea completions, well completions, and wireline applications. Below are some of our most popular products.

| Product | Description |
|---------|---|
| Joints | Blast joints, pup joints |
| Plugs | Bull plugs, test plugs |
| Subs | Lower subs, upper subs, seal subs, X-over subs |
| Other | Rings, collets, couplings, inserts, mandrels, nipples |

Services

Olympian Machine has developed expertise in numerous services widely used by the Oil & Gas industry. Those services include numerous coating and plating techniques. Below are some of the popular services provided by Olympian Machine.

| Service | Description |
|---------|--|
| Coating | Black oxide, carbide, dry moly, QPQ, xylan, zinc phosphate |
| Plating | Copper, gold, nickel |
| Other | Anodizing, bead blasting, crating, electrical discharge machining (EDM), gun drilling, hydro testing, internal slotting, ion nitriding, NDE and hardness inspection, stamping, welding |

Sample Parts

Olympian Machine produces precision made parts in outside diameters up to 40 inches and lengths up to 480 inches. Our modern, highly automated equipment allows us to produce custom parts with tolerances as tight as 0.0002 inches.
